Société du Canal de Provence ICID2015 Florence Malerbe, SCP, Florence.MALERBE@canal-de-provence.com 26th ERC & 66th IEC

1. Overall information of the project

Project title	Société du Canal de Provence
Localization	France
Date of operation	1963-2038

Public partner	Local authorities (PACA Region, Departments, city of Marseille), CDC			
Private partner	Minority shareholders (Chambres d'Agriculture, Crédit agricole)			
Project size	Multipurpose infrastructure covering 10 000 km ²			
Cost of the project	2,5 billions euros (actual value)			
Number of farmers targeted / Population covered	6 000 farmers 110 cities and villages (<i>over 2M inhabitants)</i> 800 companies and industries			
Short description of production	Agricultural diversity in terms of crops (cereals, vine, arboriculture and			

4. Paiement of the fees

100 % by the users Differentiated tariff system mainly based on uses (agriculture, urban, industrial,...) and localization

system	nonticulture) and size of familis		Present cost structure	The Verdon
Infrastructure / irrigation type	Gravity-fed main infrastructure Pressurized distribution networks Sprinkler and localized irrigation	33 %	 Asset development: Loans reimbursements (past and present investments in infrastructure) 	
		32 %	 Long term maintenance, renewal and modernization 	

2. Type of contract and term

75 years Concession contract (1963-2038)

3. Investment funding source and sharing of the cost

- Almost 50% funding coming from the users, via water tariffs
- 50% from public authorities including PACA region, departments, lacksquareState and Europe

5. Risk management

25 %

10 %

All risks are covered by SCP : technical, financial, commercial,...

6. Performance evaluation

Economic efficiency allows the company to pursue its development policy and fulfill the terms of the concession contract :

Extensions of distribution networks

• Day-to-day operation and maintenance

• Taxes and miscellaneous charges

Financing the project

- Increasing water supply safety and quality of service
- Renovation : long term maintenance, renewal and modernization of the infrastructure

7. Key lessons learnt : Success factors

- Company statute (SAR) Flexibility and efficiency
- Governance
- Multipurpose infrastructure
- Technical skill and decisive choices in the design
- Pricing policy Solidarity between uses
- Continuous investment and renovation policy
- In house engineering and outside contracts
